

KINETIC FIBER

As a society, we are always connected. We expect more from our internet services. Whether that be from nearby cable or fiber optic internet providers, or a local broadband ISP. Today, fast and reliable connectivity is no longer a luxury, it is a necessity.

Kinetic Fiber brings you connectivity services at the speed of light; through our robust up to date fiber links dispersed throughout Tanzania. With supporting backup links, Kinetic Networks maintains an SLA of upto 99.9% ensuring delivery of seamless, uninterrupted internet services.

Features and services:

- **Faster cloud access:** Fiber delivers on this front. Whether you are supporting multiple team members with CRM access, or hosting, storing or connecting to the cloud, fiber allows high speed access.
- **Free installation:** We offer a free installation of fiber on a 3year term.
- **Guaranteed up time:** Up time of fiber is guaranteed and backed by a Service Level Agreement. The use of glass instead of copper-based technology makes fiber optic internet less prone to outages and down time.
- **Symmetric speeds:** Fiber upload and download speeds are faster. Many fiber connections offer symmetric up and down speeds. With broadband and cable, often only download speeds are high or advertised.
- **Unlimited data:** We hate the thought of putting limits on use of our internet services, so no data caps are in place for any internet connections that we provide.
- **Lower latency:** Means packets are sent faster over your network.
- **Increased reliability:** Fiber is less prone to downtime like copper-based services. It provides consistent and complete coverage.
- **Gigabit speeds:** Fiber can be scaled up to 1 Gbps symmetric or even 10 Gbps. Not everyone requires this level of speed, you have the means to support the needs and demands of your users.

Services:

- **Fiber optic surveys**
- **FTTH, FFTX, Metro Fiber design, LAN, deployment, maintenance and monitoring**
- **Fiber splicing, fault location and mitigation using laser tools and OTDR**
- **24 × 7 support and monitoring**

*** Includes supply of all optical fiber accessories and components**
