

# KINETIC WIRELESS

Reliable, scalable and affordable dedicated access that is backed by regional and local support centres with a leading Service Level Agreement, Kinetic Networks LTD is the partner to choose when looking for best-in-class Internet Access.

## Benefits:

- **Predictable pricing:** No hidden charges, enabling you to budget based on transparent costs
- **Reliable connectivity:** As a managed service, have the peace of mind to know that you will always have a reliable, redundant and high-performance service
- **Protected against attacks:** Our service has an overlay that ensures real time security monitoring
- **Superior user experience:** Reduced latency through an IP backbone designed to keep regional traffic within the African continent to ensure the shortest path access and cost-effective delivery of business continuity
- **Uninterrupted service:** with a highly meshed self healing backbone for 99.9% availability on our network, your service is always up and running

## Features and services:

Dedicated Internet Access offers you:

- **A reliable and resilient high-speed internet backbone network:** delivers data securely, along the most optimised route possible via our own infrastructure
  - **Guaranteed Flexible Bandwidth:** through a dedicated port available in various bandwidths ranging from 1Mbps to 10Gbps
  - **A range of access method:** through Fibre, Wi-Max, Microwave and Satellite
- Scalable based on the number of employees, offices, and locations taking into consideration customer traffic and data usage. Easily upgrade as your bandwidth requirements change overtime
